

# INSTRUCTIONS FOR STRAW CUPS

with **SAMTECH™** valve (patent pending)

## ACTIVE STRAW CLEANING INSTRUCTIONS

- 1 Unscrew lid
- 2 Pop up straw
- 3 Remove trigger **A** by lifting to right then left and then separate from straw.
- 4 Remove retainer **B** by pulling gently downwards.
- 5 Remove straw valve **C** by lifting one side and then pulling firmly downwards through lid.
- 6 Wash all parts in warm soapy water and rinse thoroughly. Not suitable for microwave or dishwasher sterilisation.

## REASSEMBLY OF YOUR ACTIVE STRAW

- 1 Align parts **B** and **C** and firmly push button on part **C**. (See diagram 1) Ensure that 'button' of the soft side is pushed through the holes of the hard side.
- 2 Thread these two parts through the hole in the lid until they click into place. Pull straw to ensure fit. (See diagram 2)
- 3 Now that the straw is in place. Feed the straw through the hole on the trigger (see diagram 3) and click button back into place.
- 4 Add liquid and screw lid back on.
