

WARNING

**DO NOT TIE SOOTHER AROUND BABY'S NECK AS IT PRESENTS A STRANGULATION HAZARD
A TORN OR BROKEN SOOTHER POSES A CHOKING HAZARD. INSPECT CAREFULLY BEFORE EACH USE.
PULL THE TEAT IN ALL DIRECTIONS. THROW AWAY AT THE FIRST SIGN OF DAMAGE OR WEAKNESS.
A CORD OR RIBBON ATTACHED TO A SOOTHER POSES A STRANGULATION HAZARD. DO NOT ATTACH
A SOOTHER TO YOUR CHILD'S CLOTHING.**

For your child's safety

WARNING!

Inspect carefully before each use. Pull the soother in all directions. Throw away at the first signs of damage or weakness.

Only use dedicated soother holders tested to EN 12586. Never attach other ribbons or cords to a soother, your child may be strangled by them. Decorations shall not be added to soothers as they may detach and the child could choke on them. Pins, ribbons or string shall not be attached to any part of the soother (i.e. around the ring, plug or through the ventilation holes) as these can be strangulation hazards. Strangulation hazards include the cutting off of blood supply to fingers and limbs. In the event that the soother becomes lodged in the mouth, **DO NOT PANIC**; it cannot be swallowed and is designed to cope with such an event. Remove from the mouth with care and as gently as possible. **Replace the soother after one month, for safety and hygiene reasons.** If the soother has removable teat protection, keep away from children to avoid suffocation.

CLEANING AND STERILISATION

Before first use place the soother in boiling water for 5 min, allow to cool, and squeeze out any trapped water from the soother. This is to ensure hygiene. Clean and sterilise before each use. Wash in warm soapy water and rinse in clean water or use a dishwasher (top shelf only). Remove any water that may have entered the teat by squeezing the teat. Do not clean with solvents or harsh chemicals. Suitable for sterilisation by steam (electric and microwave), boiling or cold water tablet/liquid solution.

DO NOT sterilise the display case. It is not intended to be used for sterilisation or storage and should be disposed of correctly.

STORAGE AND USE

Do not leave a soother in direct sunlight or near a source of heat, or leave in disinfectant ("sterilising solution") for longer than recommended, as this may weaken the teat. Do not store with or allow to come into contact with solvents or harsh chemicals. Store the soother in a dry, covered container when not intended to be used immediately after sterilisation. Do not store in direct sunlight or near a source of heat. Never dip teat in sweet substances or medication, your child may get tooth decay.

Complies with Australian Safety Standard AS2432 and European Safety Standard EN 1400
